

INTRODUCING VERSION 14 LTS

For Integrators and Developers

 **TYPO3 CMS**

THE **NEXT GENERATION** OF TYPO3

v14 LTS

WHAT'S NEW IN **TYP03 V14 LTS** FOR DEVELOPERS AND INTEGRATORS?

- Fluid 5
- Modernized Localization
- Improved Extbase Authorization
- Stable System Requirements

 **TYPO3 CMS**

FLUID 5

Cleaner, Safer and More Flexible

v14 LTS

REACHING A **MILESTONE**

- Variable file naming
- Native CDATA support
- New & improved ViewHelpers

NEXT GENERATION OF FLUID

Variable capitalization and file endings improve **syntax highlighting in IDEs**.

The new *StrictArgumentProcessor* delivers **clear error messages** for wrong data types.

CDATA support, allowing you to include raw styles and **scripts without conflicts** caused by curly braces {}.

 **TYP03 CMS**

MODERNIZED LOCALIZATION

Advanced Multi-Language Architecture

v14 LTS

TRANSLATION WITH **EASE**

- Clean syntax
- Semantic module labels
- Auto-discovery & mapping
- CLI audit commands

TRANSLATION DEVELOPMENT WORKFLOW

Replaced bulky *LLL:EXT:...* paths with clean Symfony-inspired **Streamlined syntax** dot notation.

Automatic scanning of language directories with deterministic **caching for high performance.**

New **language audit terminal commands** to explore translations easily.

 **TYP03 CMS**

SMART ERROR COPYING

Improved Exception Handling With Copy Functionality

v14 LTS

DEBUG, COPY, REPEAT

- One-click clipboard copy
- Full stack trace export
- Markdown-ready format
- Instant bug reporting

ELEVATED DEBUGGING WORKFLOW

One-click copy button: The enhanced *debug exception handler* now features a button that instantly formats all error details into **structured markdown**.

This **eliminates manual copying** and ensures your team gets precise data to resolve issues faster than ever.

 **TYPO3 CMS**

DECLARATIVE AUTH

Secure Actions Using Native PHP Attributes

v14 LTS

SMART ACCESS **GUARD**

- Native PHP attributes
- Group & login checks for plugins
- Custom auth classes
- Automatic 403 responses

MODERN EXTBASE AUTHORIZATION

The newly implemented *Extbase action authorization attribute* can now utilize a custom #[Authorize] logic via a new PHP attribute.

Since **authorization classes now support dependency injection**, complex authorization rules can be unit-tested easily and in isolation.

 **TYP03 CMS**

REQUIREMENTS & SUPPORT

What You Need to Run TYPO3 V14 LTS

v14 LTS

SYSTEM REQUIREMENTS

- PHP 8.2, 8.3, 8.4, 8.5
- MariaDB 10.4.3+ / MySQL 8.0.17+ / PostgreSQL 10.0+ / SQLite 3.8.3+
- Modern browsers

LONG-TERM SUPPORT

- Free: 2029-06-30
- ELTS: 2033-06-30
